

Table of Contents

1	EXECUTIVE SUMMARY.....	1-1
2	GMT OVERVIEW.....	2-1
2.1	Introduction.....	2-1
2.2	Consortium.....	2-1
2.3	Heritage.....	2-2
2.4	Science Case, Science Requirements, and Instruments.....	2-2
2.5	Technical Overview.....	2-4
2.5.1	Primary Segments and Optics.....	2-4
2.5.2	Instrument Accommodations.....	2-5
2.5.3	Operating Modes.....	2-6
2.5.4	Enclosure.....	2-7
2.6	Site Selection.....	2-8
2.7	Project Status and Development Plan.....	2-9
3	SCIENCE CASE.....	3-1
	Introduction.....	3-1
3.1	Planets and their Formation.....	3-4
3.1.1	Direct Imaging of Exosolar Planets.....	3-5
3.1.2	Radial Velocity Planet Detection.....	3-9
3.1.3	From Disks to Planets.....	3-10
3.1.4	The Solar System.....	3-11
3.1.5	Star Formation and the IMF.....	3-12
3.1.6	The Initial Mass Function.....	3-12
3.1.7	Collapse of Molecular Clouds to Stars and Disks.....	3-14
3.2	Stellar Populations and Chemical Evolution.....	3-15
3.2.1	Diffraction-limited imaging of resolved stellar populations.....	3-15
3.2.2	High Resolution Stellar Spectroscopy.....	3-17
3.3	The Assembly of Galaxies.....	3-19
3.3.1	From Seed Fluctuations to the Hubble Sequence.....	3-19
3.3.2	The Evolving Galaxian Stellar Mass Function.....	3-20
3.3.3	Mapping the underlying dark matter.....	3-22
3.3.4	Star Formation and the Origin of the Hubble Sequence.....	3-23
3.3.5	The Chemical Evolution of Galaxies.....	3-24
3.3.6	Tomography of the IGM.....	3-25
3.4	Black Holes in the Universe.....	3-27
3.4.1	The Largest Black Holes.....	3-28
3.4.2	The Smallest Black Holes.....	3-29
3.5	The Accelerating Universe.....	3-31
3.5.1	Baryonic Oscillations.....	3-31
3.5.2	Supernovae at High Redshift.....	3-32
3.5.3	LISA follow-up.....	3-33
3.6	First Light and the Reionization of the Universe.....	3-34
3.6.1	Reionization of the IGM.....	3-34
3.6.2	First Light.....	3-35
3.7	Closing Thoughts.....	3-37
3.8	References.....	3-39
	Appendix.....	3-41

4	SCIENCE REQUIREMENTS	4-1
4.1	Summary	4-1
4.2	High Level Science Goals.....	4-1
	4.2.1 Planets and Their Formation	4-1
	4.2.2 Stellar Populations and Chemical Evolution.....	4-2
	4.2.3 Assembly of Galaxies.....	4-3
	4.2.4 Black Holes	4-4
	4.2.5 Dark Energy and the Accelerating Universe.....	4-4
	4.2.6 First Light and Reionization.....	4-5
	4.2.7 Summary of High Level Science Requirements	4-6
4.3	Definition of the Telescope and Related Systems	4-6
	4.3.1 The Telescope.....	4-6
	4.3.2 Primary Mirror	4-7
	4.3.3 Secondary Mirrors.....	4-7
	4.3.4 Fold Mirrors	4-7
	4.3.5 Coatings.....	4-7
	4.3.6 Wide-field Corrector	4-8
	4.3.7 Atmospheric Dispersion Compensation.....	4-8
	4.3.8 Guiders, Wavefront Sensors and Active Optics.....	4-8
	4.3.9 Focal Stations	4-8
	4.3.10 Slewing and Tracking.....	4-8
	4.3.11 Mechanical Stability.....	4-9
	4.3.12 Up-Time	4-9
	4.3.13 Enclosure Requirements.....	4-10
4.4	Site Requirements	4-10
	4.4.1 Light Pollution and Environmental Constraints.....	4-10
	4.4.2 Seeing requirements	4-11
	4.4.3 Weather Conditions.....	4-11
	4.4.4 Thermal IR Performance.....	4-11
4.5	First Generation Instruments	4-11
	4.5.1 The visible multi-object spectrograph.....	4-11
	4.5.2 Cryogenic IR Spectrometers	4-13
	4.5.3 The Mid-IR AO Imager and Spectrometer.....	4-15
	4.5.4 Near-IR High Resolution Spectrograph	4-15
	4.5.5 The Visible High Resolution Spectrometer.....	4-16
	4.5.6 The Near-IR ExAO Imager and IFU.....	4-16
	4.5.7 Matching Instruments and Science Goals	4-17
4.6	Adaptive Optics Capabilities	4-18
	4.6.1 Sensors and Guide Beacons	4-18
	4.6.2 First Generation AO Capabilities.....	4-18
	4.6.3 Second Generation AO Capabilities.....	4-19
4.7	Support Facilities	4-20
	4.7.1 Coating and Cleaning Facilities and Spare Primary Segment.....	4-20
	4.7.2 Instrument Support Laboratory	4-20
	4.7.3 Observer Support Facilities	4-21
4.8	Operational Requirements	4-21
	4.8.1 General Operating Principles	4-21
4.9	Performance Requirements.....	4-22
	4.9.1 Conventions and Metrics.....	4-22
	4.9.2 Throughput.....	4-22
	4.9.3 Emissivity.....	4-23
	4.9.4 Image Size and Wavefront Error Requirements.....	4-23
	4.9.5 Applicability of the image size and wavefront requirements.....	4-25
	Appendix.....	4-27

5	SITE EVALUATION.....	5-1
5.1	Introduction.....	5-1
5.2	Considerations for Site Selection.....	5-2
	5.2.1 Hemisphere Choice.....	5-3
	5.2.2 Impact of Cloud Cover.....	5-3
	5.2.3 Impact of Seeing.....	5-3
	5.2.4 Impact of PWV on Mid-IR Science.....	5-4
	5.2.5 Risk Factors.....	5-4
	5.2.6 Derived Site Requirements.....	5-5
5.3	Chilean ELT Sites.....	5-5
	5.3.1 Moderate Elevation Sites in Chile.....	5-6
	5.3.2 High Elevation Sites in Chile.....	5-7
5.4	GMT Baseline SITE.....	5-9
	5.4.1 Summary of the Properties of Las Campanas.....	5-9
	5.4.2 Basis for Selection.....	5-10
	5.4.3 History and Infrastructure.....	5-10
	5.4.4 Sites within the LCO Property.....	5-10
5.5	LCO Site Characterization Methods and Results.....	5-13
	5.5.1 Light Pollution.....	5-13
	5.5.2 Seeing.....	5-14
	5.5.3 Cloud Cover.....	5-21
	5.5.4 Wind Speed and Direction.....	5-23
	5.5.5 Temperature.....	5-27
	5.5.6 Precipitable Water Vapor.....	5-29
	5.5.7 Future Testing Plans.....	5-35
5.6	Summary and Conclusions.....	5-35
	Appendix.....	5-37
6	OPTICS.....	6-1
6.1	Introduction.....	6-1
6.2	Basic Aplanatic Gregorian Design.....	6-2
	6.2.1 Prescription.....	6-2
	6.2.2 Image Quality.....	6-4
	6.2.3 Diffraction performance.....	6-5
	6.2.4 Emissivity.....	6-6
6.3	Wide-field Corrector/Atmospheric Dispersion Compensator.....	6-10
6.3.1	Design Considerations.....	6-10
	6.3.2 Optical Materials.....	6-12
	6.3.3 Performance.....	6-13
	6.3.4 Alignment.....	6-15
	6.3.5 Manufacturing Considerations.....	6-17
6.4	Optical Coatings.....	6-18
6.5	Technical Challenges and Risks.....	6-19
6.6	References.....	6-20

7	TELESCOPE STRUCTURE	7-1
7.1	Introduction.....	7-1
7.2	Overview.....	7-2
7.3	Requirements & Specifications	7-4
7.4	Main Structure	7-7
	7.4.1 OSS structures.....	7-7
	7.4.2 C-ring assembly.....	7-8
	7.4.3 Primary mirror structural assembly.....	7-11
	7.4.4 Secondary truss.....	7-13
	7.4.5 Cell removal and installation for recoating.....	7-17
	7.4.6 Instrument Platform.....	7-19
	7.4.7 Azimuth structure.....	7-20
	7.4.8 Cost Estimate Structure Drawings	7-24
	7.4.9 Weight summary	7-27
7.5	Pier.....	7-28
7.6	Performance.....	7-31
	7.6.1 Gravity Deflections	7-31
	7.6.2 Modal Performance.....	7-33
	7.6.3 Wind Dynamic Response	7-38
7.7	Mechanisms	7-44
	7.7.1 Main Axis Bearings.....	7-44
	7.7.2 Main Axis Drives	7-48
	7.7.3 Instrument Platform Assembly.....	7-49
	7.7.4 Mirror Covers.....	7-51
	7.7.5 Counterweights.....	7-54
7.8	Manufacturing Issues.....	7-57
	7.8.1 C-ring machining and assembly	7-58
	7.8.2 Outer cell interchangeability	7-59
7.9	Technical Challenges & Risks.....	7-60
7.10	References.....	7-63
8	OPTICAL ALIGNMENT AND CONTROL STRATEGY	8-1
8.1	Introduction.....	8-1
8.2	Overview.....	8-1
8.3	Description.....	8-2
	8.3.1 Control Regimes.....	8-2
	8.3.2 Active Controls.....	8-3
	8.3.3 Fast-tracking Control Mode	8-5
	8.3.4 Adaptive Control	8-5
	8.3.5 Summary	8-6
8.4	Sensors	8-7
	8.4.1 Active Wavefront Sensor	8-7
	8.4.2 Primary Mirror Edge Sensors.....	8-9
8.5	Active Control of Optical Misalignment.....	8-12
	8.5.1 Compensation using Secondary Segment Motions.....	8-12
	8.5.2 On-axis Correction	8-14
	8.5.3 Wide-field Correction.....	8-15
	8.5.4 Secondary Mirror Segment Alignment Tolerances.....	8-17
	8.5.5 Conclusion.....	8-18
8.6	Mirror Figure Control.....	8-18
8.7	Control Hierarchy	8-18
8.8	Cross-talk.....	8-20
8.9	References.....	8-21

9	ADAPTIVE OPTICS	9-1
9.1	Overview of GMT Adaptive Optics	9-1
	9.1.1 Introduction	9-1
	9.1.2 Goals for the GMT AO System.....	9-2
	9.1.3 GMT AO Challenges.....	9-4
	9.1.4 Meeting the Challenges	9-5
	9.1.5 AO System Architecture and First Operational Modes.....	9-8
	9.1.6 Organization of the AO Chapter	9-13
9.2	AO Requirements	9-14
	9.2.1 Some AO definitions.....	9-14
	9.2.2 Summary of Adopted Atmospheric Parameters.....	9-16
	9.2.3 Wavefront Accuracy Requirements	9-16
	9.2.4 LGS Performance Requirements.....	9-16
	9.2.5 NGS Performance Requirements	9-17
	9.2.6 Additional Requirements for Diffraction Limited AO.....	9-18
	9.2.7 Requirements for Thermal AO.....	9-18
	9.2.8 ExAO Requirements for Imaging Extrasolar Planetary Systems.....	9-19
	9.2.9 GLAO Requirements.....	9-26
	9.2.10 Summary of Top Level System Performance Requirements	9-28
9.3	Field Development and Tests of Advanced Systems for GMT AO	9-33
	9.3.1 Introduction	9-33
	9.3.2 Adaptive Secondary Mirrors	9-33
	9.3.3 Wavefront Sensing with Multiple Laser Guide Stars.....	9-34
	9.3.4 Phase Apodization and Wavefront Sensing for ExAO	9-37
	9.3.5 Coherent Phasing of Wavefront with Discrete Segments	9-38
9.4	Wavefront Sensing Strategy and Hardware.....	9-39
	9.4.1 Overall Strategy for Wavefront Measurement	9-39
	9.4.2 The Optical and Infrared Wavefront Sensors.....	9-43
	9.4.3 Infrared Sensors.....	9-46
	9.4.4 High Resolution NGS Sensor.....	9-49
	9.4.5 Secondary Mirror Accelerometers	9-51
9.5	Laser Tomography - Sodium Beacons and their Configuration	9-52
	9.5.1 Introduction	9-52
	9.5.2 Character of the Sodium Layer and Beacon Intensity.....	9-52
	9.5.3 Geometric Considerations and Laser Choice for the GMT.....	9-54
	9.5.4 GMT Beacon Geometry	9-56
	9.5.5 Angular Diameter of the Constellation	9-57
	9.5.6 Beacon Projection System.....	9-58
9.6	AO System, Operation and Overall Performance.....	9-61
	9.6.1 Introduction	9-61
	9.6.2 The 8 m Building Blocks.....	9-61
	9.6.3 Bringing the 8 m Segments Together at a Coherent Focus.....	9-62
	9.6.4 Static Calibration of Piston of the Primary & Secondary Segments ..	9-63
	9.6.5 Performance of AO with Natural Guide Stars Only.....	9-64
	9.6.6 LTAO: Tomographic Reconstruction of Shack-Hartmann Data	9-65
	9.6.7 LTAO: NGS Measurements.....	9-68
	9.6.8 LTAO: Start Up, Capture and Operation	9-71
9.7	Real-time Reconstructor	9-72
9.8	Optical System for AO Wavefront Sensors and AO Instruments	9-73
	9.8.1 Wide field Optical AO System.....	9-73
	9.8.2 Relay Optics to near IR AO Instruments and Wavefront Sensors	9-74
	9.8.3 Relay for Thermal IR Instruments.....	9-77
9.9	References.....	9-79

10	PRIMARY MIRROR SEGMENTS	10-1
10.1	Overview.....	10-1
10.2	Requirements for primary mirror segments.....	10-2
	10.2.1 General requirements	10-2
	10.2.2 Error budget for primary mirror segments	10-2
	10.2.3 Use of structure functions.....	10-3
10.3	Active Optics	10-4
10.4	Design of the Segment.....	10-6
10.5	Fabrication	10-7
	10.5.1 Overview	10-7
	10.5.2 Requirements.....	10-8
	10.5.3 Casting procedures	10-11
	10.5.4 Generating procedures.....	10-13
	10.5.5 Polishing procedures	10-14
	10.5.6 Results for 8.4 m LBT primary mirrors	10-15
	10.5.7 Production schedule	10-20
10.6	Measurement.....	10-21
	10.6.1 Overview	10-21
	10.6.2 Requirements.....	10-23
	10.6.3 Optical figure measurement	10-24
	10.6.4 Scanning pentaprism measurement.....	10-30
	10.6.5 Laser tracker measurement.....	10-34
	10.6.6 Test tower	10-37
	10.6.7 Other tests.....	10-38
	10.6.8 Measurement of the center segment.....	10-39
10.7	1.7 m Off-Axis Demonstration	10-39
10.8	Support system.....	10-41
	10.8.1 Overview	10-41
	10.8.2 Requirements.....	10-42
	10.8.3 Optimization of support forces.....	10-43
	10.8.4 Load spreaders.....	10-44
	10.8.5 Support actuators.....	10-46
	10.8.6 Static supports	10-47
	10.8.7 Hard points	10-48
	10.8.8 Control of the support system	10-49
	10.8.9 Gravity and support errors.....	10-51
	10.8.10 Wind deflections.....	10-55
	10.8.11 Thermal performance.....	10-56
	10.8.12 Reliability and maintenance.....	10-59
10.9	Thermal control.....	10-59
	10.9.1 Ventilation requirements	10-59
	10.9.2 Design.....	10-60
10.10	Mirror transport.....	10-64
10.11	Cleaning.....	10-64
10.12	Technical challenges and risks	10-65
10.13	References.....	10-66

11	SECONDARY MIRRORS	11-1
11.1	Overview.....	11-1
11.2	Secondary mirror mount.....	11-3
11.3	Adaptive secondary mirror	11-5
	11.3.1 Overview	11-5
	11.3.2 Performance of the MMT adaptive secondary	11-7
	11.3.3 Requirements.....	11-8
	11.3.4 Design.....	11-9
	11.3.5 Control.....	11-12
	11.3.6 Manufacture.....	11-14
	11.3.7 System integration.....	11-16
	11.3.8 Calibration and testing.....	11-17
	11.3.9 Technical challenges and risks	11-18
11.4	Fast-steering secondary mirror	11-19
	11.4.1 Overview	11-19
	11.4.2 Requirements.....	11-20
	11.4.3 Segment design.....	11-20
	11.4.4 Segment manufacture	11-21
11.5	References.....	11-22
12	IMAGE AND WAVEFRONT BUDGETS	12-1
12.1	Introduction.....	12-1
12.2	Requirements	12-2
12.3	Natural Seeing Error Budgets.....	12-2
	12.3.1 Error Sources.....	12-2
	12.3.2 Narrow-field Visible-band Error Budget (Case 1).....	12-4
	12.3.3 Wide-field Visible-band Error Budget (Case 2).....	12-6
	12.3.4 Explanation.....	12-8
12.4	AO Wavefront Error Budgets (summary)	12-12
12.5	References.....	12-15
13	SCIENTIFIC INSTRUMENTS	13.1-1
13.1	Introduction.....	13.1-1
	13.1.1 Instrument concepts and the GMT science goals.....	13.1-1
	13.1.2 GMTNIRS.....	13.1-2
	13.1.3 MIISE.....	13.1-3
	13.1.4 HRCAM	13.1-3
	13.1.5 NIRMOS	13.1-3
	13.1.6 GMACS.....	13.1-4
	13.1.7 Second Generation Instruments.....	13.1-4
13.2	GMTNIRS – High Resolution Near-IR Spectrograph.....	13.2-1
13.2.1	Introduction – GMTNIRS	13.2-1
13.2.2	Optical Design.....	13.2-4
13.2.3	Mechanical Design.....	13.2-27
13.2.4	Silicon Immersion Gratings	13.2-36
13.2.5	Cryogenics and Vacuum	13.2-51
13.2.6	Internal electronics and mechanisms.....	13.2-57
13.2.7	Support Electronics	13.2-61
13.2.8	Software	13.2-62
13.2.9	Assembly, Alignment, and Integration.....	13.2-63
13.2.10	References	13.2-65
13.2.11	List of appendices	13.2-67

13.3 MIISE – A Mid-Infrared Imaging Spectrograph.....13.3-1

13.3.1	Expected Thermal Infrared Sensitivity of the GMT	13.3-1
13.3.2	Instrument Requirements	13.3-2
13.3.3	Instrument Design	13.3-5
13.3.4	References	13.3-14

13.5 NIRMOS – Near Infrared Multiple Object Spectrograph.....13.5-1

13.5.1	Introduction	13.5-1
13.5.2	Optical Design.....	13.5-3
13.5.3	Integral Field Unit	13.5-9
13.5.4	Mechanical Design.....	13.5-14
13.5.5	Detector Array.....	13.5-31
13.5.6	Electrical Design	13.5-32
13.5.7	Software Design.....	13.5-34
13.5.8	Guiders and Wavefront Sensors.....	13.5-35
13.5.9	Appendix A: Optical Prescription	13.5-36
13.5.10	Appendix B: Imaging Performance Summary	13.5-37
13.5.11	Appendix C: Grating Efficiencies	13.5-46

13.6 GMACS – The GMT Wide-Field Optical Spectrograph.....13.6-1

13.6.1	Multi-Slits or Fibers?	13.6-1
13.6.2	Field of View.....	13.6-1
13.6.3	Resolution and Spectral Coverage	13.6-3
13.6.4	An Imaging Spectrograph?.....	13.6-4
13.6.5	GMACS Fly’s-Eye Collimators	13.6-5
13.6.6	GMACS Red and Blue Cameras.....	13.6-11
13.6.7	GMACS Red and Blue Gratings	13.6-17
13.6.8	GMACS Optical Layout.....	13.6-20
13.6.9	GMACS Optical Performance	13.6-22
13.6.10	Detectors.....	13.6-24
13.6.11	Flexure Compensation and Baffles	13.6-24
13.6.12	GMACS Mechanical Layout.....	13.6-27
13.6.13	Summary and Acknowledgements.....	13.6-33
13.6.14	References	13.6-33

14 ENCLOSURE	14-1
14.1 Introduction.....	14-1
14.2 Requirements	14-3
14.3 Site Plan	14-5
14.4 Layout and Floor Plans	14-8
14.4.1 The Pier	14-8
14.4.2 Enclosure Base	14-8
14.4.3 Carousel.....	14-10
14.5 Structure.....	14-15
14.6 Wall Systems	14-17
14.7 Mechanical Systems	14-19
14.7.1 Main Doors.....	14-19
14.7.2 Rotation Drives and Bogies.....	14-20
14.7.3 Ventilation Windows.....	14-21
14.7.4 Overhead Crane.....	14-22
14.7.5 Instrument Service Lift.....	14-23
14.7.6 Power Requirements.....	14-24
14.8 Mirror and Instrument Handling.....	14-26
14.8.1 Central lift.....	14-26
14.8.2 Primary mirror exchange.....	14-28
14.8.3 Instrument exchange.....	14-31
14.8.4 Secondary Mirror Service	14-32
14.9 Thermal Design.....	14-35
14.9.1 Dome seeing.....	14-35
14.9.2 LCO temperature conditions	14-36
14.9.3 Heat balance	14-36
14.9.4 Summary	14-38
14.10 HVAC Requirements.....	14-39
14.11 Future Studies	14-41
14.12 References.....	14-42
15 SUMMIT FACILITIES.....	15-1
15.1 Introduction.....	15-1
15.2 Requirements Document.....	15-2
15.3 Control Building	15-3
15.4 Auxiliary Building	15-5
15.5 Coating Plant.....	15-7
15.5.1 Concept.....	15-7
15.5.2 Chamber	15-8
15.5.3 Mirror Removal and Preparation.....	15-8
15.5.4 Mirror Washing and Preparation.....	15-10
15.6 Facility Building	15-10
15.7 Equipment Building.....	15-13
15.8 Ventilation Tunnel	15-15
15.9 Utility Infrastructure	15-15
15.10 References.....	15-17

16	PROJECT IMPLEMENTATION	16-1
16.1	Introduction.....	16-1
16.2	The GMT Partners	16-1
16.3	Preliminary Phase	16-2
16.4	GMT Organization.....	16-2
	16.4.1 GMT Agreement	16-2
	16.4.2 Organizational structure	16-3
	16.4.3 Project Office	16-4
16.5	Project Phases	16-5
16.6	Systems Engineering.....	16-7
	16.6.1 Systems Engineering Management	16-7
	16.6.2 Document Management	16-8
	16.6.3 Software Standards.....	16-8
	16.6.4 Configuration Control	16-8
	16.6.5 Design Requirements Documents	16-8
	16.6.6 Interface Control Documents	16-9
	16.6.7 Error Budget Management	16-9
	16.6.8 Product Assurance.....	16-9
	16.6.9 Performance and Operations Modeling.....	16-10
16.7	Implementation Plan	16-12
	16.7.1 Work breakdown structure (WBS).....	16-12
	16.7.2 Staffing plan	16-14
	16.7.3 Contracting Strategy.....	16-16
	16.7.4 Risk Management.....	16-17
	16.7.5 Cost Management.....	16-18
	16.7.6 Safety Program.....	16-19
	16.7.7 Project Meetings.....	16-19
	16.7.8 Reports.....	16-19
	16.7.9 Schedule	16-20
	16.7.10 Commissioning Plan	16-20

17 OPERATIONS MODEL	17-1
17.1 Introduction.....	17-1
17.2 Science Requirements for Operations.....	17-3
17.3 Observing Modes.....	17-3
17.3.1 Classical PI Observing	17-3
17.3.2 Remote PI Observing	17-4
17.3.3 Queue Scheduled Service Observing	17-4
17.3.4 Synoptic and Time-Critical Observations	17-4
17.3.5 Targets of Opportunity and Rare Condition Programs	17-4
17.4 Night Operations Personnel.....	17-5
17.5 Day Operations Personnel and Technical Support Staff	17-6
17.5.1 Chile Operations.....	17-6
17.5.2 Mountain Operations.....	17-7
17.5.3 Technical Operations.....	17-7
17.5.4 Observing Support.....	17-7
17.5.5 US Operations	17-7
17.6 Personnel Requirements	17-7
17.6.1 The US Corporate Office	17-8
17.6.2 The US Operations Center	17-8
17.6.3 The Chilean Support Base.....	17-8
17.6.4 On-Site Operations.....	17-9
17.7 Instrumentation and Facility Upgrades.....	17-9
17.8 Estimation of Operating Costs.....	17-10
17.8.1 Cost Basis.....	17-10
17.8.2 Capital Costs in Support of Operations.....	17-10
17.8.3 Facilities Costs	17-10
17.8.4 Corporate and Administrative Costs	17-10
17.8.5 Operations Costs.....	17-10
17.8.6 Instrumentation and Facility Improvements.....	17-11
17.8.7 Contingency and Reserve.....	17-11
17.8.8 Total Annual Operations Cost.....	17-11
17.9 Appendix.....	17-13
